

YBJ-3S, 3W Bellows Type Expansion Pipe Joint

®Mark inscription allowed product/ Korea register of ahipping model approval

This is an expansion pipe joint used for cold water, hot water, or other copper pipelines.

Features

- Absorb the expansion & contraction of pipelines by temperature changes.
- Stainless steel ensuring high level of corrosion resistance leads little fluid pressure loss : Inner tube materials which come into contact with fluid are made of stainless steel.
- Outer tube has been used to prevent damage to bellows from impact,
- Internal pressure type product prevents noise.
